

The read-only `localStorage` property allows you to access a `Storage` object for the Document's origin; the stored data is saved across browser sessions. `localStorage` is similar to `sessionStorage`, except that while data stored in `localStorage` has no expiration time, data stored in `sessionStorage` gets cleared when the page session ends — that is, when the page is closed. (Data in a `localStorage` object created in a "private browsing" or "incognito" session is cleared when the last "private" tab is closed.)
